

Global Lawful Records Access Manual

Operational checklist · Decision tree · All tools & steps · Business / Deeds / Legal specialty
live-online-agent-swarm · skill: global-lawful-records-access · 2026-09-09

Lawful channels only. No illegal bypassing. No exploits. No circumvention.

Global Lawful Records Access Manual

****Lawful channels only. No illegal bypassing. No exploits. No circumvention.****

This manual is the PDF-ready consolidation of the `global-lawful-records-access` skill: complete operational checklist, flowchart decision tree, full tools+steps inventory, and a specialized runbook for ****business records, deeds, and legal filings**** worldwide (USA-inclusive).

1. Core doctrines

1. ****Authorization**** — Access only what you are authorized to access (public portal, statutory fee, FOIA grant, library credential you hold, employment, court order, client engagement).
2. ****Ownership / public status**** — Prefer public records and open data. Paywalls may have lawful alternatives; they must not be cracked.
3. ****Barrier validity**** — Login walls, paywalls, role gates, CAPTCHAs, and robots.txt are valid barriers. Route around them only via authorized channels.

****If the only path is illegal, stop and document lawful alternatives.****

2. Complete operational checklist

A. Job intake

- ■ Purpose stated
- ■ Type: business · property · court · academic · government · corporate · news
- ■ Country / state / county identified
- ■ Names / IDs / addresses listed (with spelling variants)
- ■ Barrier expected
- ■ Authorization doctrine satisfied
- ■ HITL if bulk / irreversible
- ■ Compliance gates passed
- ■ Data minimization plan

B. Path selection

- ■ Free portal → use
- ■ Statutory fee → pay
- ■ FOIA path → file
- ■ Library / ILL → use held credential

- ■ Role-based → document auth before login
- ■ Sealed → counsel / motion only
- ■ No lawful path → STOP

C. Pre-flight

- ■ Official portal URL
- ■ ToS / robots skim for bulk
- ■ Rate plan
- ■ Capture plan (PDF, URL, time, SHA-256)
- ■ Vault path set

D. Execute by type (tick relevant)

- **Business:** SOS / EDGAR / Companies House / ASIC / MCA / ACRA / OpenCorporates / 990
- **Property:** Recorder / assessor / ACRIS / land registry / fee images
- **Court:** CourtListener → PACER / state portal; public only
- **Government:** Data.gov / reading room → FOIA
- **Academic:** Unpaywall / arXiv / PMC / CORE; no pirate
- **News/archives:** wire, press, Wayback, national archives

E. Post-collection

- ■ Provenance logged
- ■ Hash if evidence
- ■ SOLID/MAYBE/CONTESTED
- ■ PII minimized
- ■ Dual-persist
- ■ Negatives + FUs logged

F. Never

Crack · CAPTCHA farm · credential fraud · sealed bypass · pirate academic · private bulk beyond public record

3. Flowchart decision tree

```
START → TYPE → JURISDICTION → BARRIER → AUTHORIZED?
NO → STOP (list FOIA / fee / counsel / library / order)
YES → branch:
```

```
BUSINESS: SOS / EDGAR / Companies House / ASIC / MCA / ACRA / OpenCorporates
PROPERTY: County recorder · ACRIS · HM Land Registry · cadastre (fee OK)
COURT:    CourtListener → PACER · state portals · national courts
          Sealed → motion only
ACADEMIC: DOI → Unpaywall → OA repos → library ILL
GOV:      Open data → FOIA
NEWS:     Free / press / library / Wayback
LOGIN:    Lawful credential only
```

```
AFTER: URL+time+portal → hash → confidence tag → minimize → persist → END
```

Barrier matrix

```
· Barrier · Lawful · Forbidden ·
|---|---|---|
· Free portal · Use · - ·
```

- Statutory fee • Pay • Steal •
- Library wall • Your access • Share/crack login •
- PACER fee • Pay/waiver • Fraud •
- FOIA lag • Wait/appeal • Intrusion •
- Login gate • Authorized credential • Stuffing/spoof •
- CAPTCHA • Manual/API • Farms •
- Sealed • Court order path • Any other •

4. All tools + all steps

USA Business

- SEC EDGAR — public filings
- State Secretary of State searches — private entity docs
- IRS EO — Form 990
- OpenCorporates — cross-border
- UCC portals — liens

****Steps:**** jurisdiction → search name/officer → download filings → officers/agent → EDGAR if public → UCC optional.

USA Property

- County recorder / clerk
- County assessor / GIS
- NYC ACRIS + Open Data datasets
- JustFix Who Owns What

****Steps:**** address→county/BBL → assessor owner → recorder docs → fee images if needed → chain of title.

USA Courts

- CourtListener / RECAP (free first)
- PACER (paid federal)
- State e-portals (NYSCEF, etc.)

****Steps:**** federal vs state → party search → docket → public PDFs → cite case/doc numbers.

USA Government

- FOIA.gov, Data.gov, Federal Register, agency reading rooms

****Steps:**** search published → else FOIA → track ID → appeal if needed.

International (sample)

```

    • Country • Business • Property • Courts • Open data •
[---|---|---|---|---|]

    • UK • Companies House • HM Land Registry • HMCTS • data.gov.uk •
    • AU • ASIC • state • Federal Court • data.gov.au •
    • IN • MCA • state land • eCourts • data.gov.in •
    • SG • ACRA • SLA • eLitigation • data.gov.sg •
    • NZ • Companies Office • LINZ • courts • — •
    • EU • national + OpenCorporates • cadastre • CJEU • data.europa.eu •

```

Academic

Universal 10 steps

1 Classify · 2 Authorize · 3 Select portal · 4 Search · 5 Retrieve lawfully · 6 Prove provenance · 7 Minimize · 8 Tag confidence · 9 Persist · 10 Escalate lawfully or stop

5. Specialized: Business, Deeds & Legal filings

5.1 Business records

****Get:**** articles, annuals, officers, agents, charges, 10-K/Q, 990s.

****Playbooks:**** USA SOS+EDGAR; UK Companies House (+PSC); AU/IN/SG national registers.

****Schema:**** entity, jurisdiction, reg#, status, officers, agent, address, filing_date, url, time, hash.

5.2 Deeds & property

****Get:**** deeds, mortgages, liens, tax owner, GIS, condo lots.

****Playbooks:**** US county model; NYC ACRIS bulk join; UK title register fee.

****Pattern:**** occupancy without unit deed → sponsor/corporate hold (document as structure).

****Schema:**** address, parcel/BBL, owner, doc_id, type, date, grantor, grantee, url, time, hash.

5.3 Legal filings

****Get:**** public pleadings, orders, judgments, dockets.

****Not:**** sealed without order.

****Playbooks:**** CourtListener first → PACER; state portals; foreign national courts.

****Schema:**** case, number, court, doc#, type, filed, parties, counsel, url, time, hash.

5.4 Combined recipe

Name → SOS/OpenCorporates → addresses → recorder/ACRIS → CourtListener → graph (OWNS / OFFICER / PARTY)
→ confidence → dual-persist.

6. Integration with investigation swarm

- Gates: `legal-osint-compliance-layer`
- Harvest ethics: `ethical-data-harvesting`
- Search: `search-techniques-master` / `dorking-mastery`
- Archives: `wayback-machine-mastery`
- NYC example stack: ACRIS Open Data → parties/legals → JustFix officers → fee deeds → PACER captions

7. Sign-off block

Field	Value
Job ID	
Operator	
Date	
Types collected	
Portals used	
Fees paid	Y/N
FOIA IDs	
SHA-256 list	
HITL ref	
Compliance pass	Y/N
